How can i obtain a demo key. Still now i didn't get any key or serial. I registered couple of days before and yet i didn't receive the key. One more thing is regarding the pricing. Actually the requirement is i have three types of users one is regular user, another apartment owners and the last Administrator. To achieve this which package do u suggest. If everything goes on well, i would like to buy this product from as soon as possible, because there's an urgent requirement. so pls get back to me regarding the KEY and PRICING at the earliest.
