## BugHotel NextGen Extra Services Module

Posted by admin - 2008/03/06 15:44

---

The following is a summary describing some of the features of the BugHotel Reservation System NextGen:: Extra Services Module:

An extra service is a product usually sold by an Hotel that consists of multiple components. Some of these components may be breakfast, champagne on arrival, limousine from the airport, chocolates and dinner in the restaurant.

There is an unlimited number of extra service that can be created. Each extra service can consist of a different costing structures, which means that it can be free, normal rate, per day rate or per person rate. Extra services can be set up in the system for specific periods in the year and /or for a particular duration and may also be combined with a normal rates resulting in additional flexibility.

BugHotel Reservation System NextGen Edition Extra Services Module allows each hotel or travel portal operator to setup these components.

In the web site front system this is how it looks like:

Extra Services:

[http://www.bug-hotel.org/screenshots/extraservices/extraservices\\_selection.png](http://www.bug-hotel.org/screenshots/extraservices/extraservices_selection.png)

Extra Services attached to the room selection:

[http://www.bug-hotel.org/screenshots/extraservices/extraservices\\_selection\\_overall\\_picture.png](http://www.bug-hotel.org/screenshots/extraservices/extraservices_selection_overall_picture.png)

Selection can be changed according and more tags can be added like descriptions, policies, etc... (this is just the basics)

---

If extra services are set as mandatory then in the front reservation they are automatically checked and the end user is forced to reserve them.

Example:

<http://www.bug-hotel.org/screenshots/extraservices/extraservices-mandatory.png>

and

<http://www.bug-hotel.org/screenshots/extraservices/extraservices-mandatory-2.png>
